1. Identification

Product identifier used on the label

Irganox® 1010

Recommended use of the chemical and restriction on use

Recommended use*: stabilizer
Unsuitable for use: The product is not recommended to be used in contact with mucous membranes, abraded skin, or blood; or for the manufacture of implants for the human body as it has not been tested for these applications.
For detailed regulatory information please request a Food Contact Certificate (FCC).

* The “Recommended use” identified for this product is provided solely to comply with a Federal requirement and is not part of the seller’s published specification. The terms of this Safety Data Sheet (SDS) do not create or infer any warranty, express or implied, including by incorporation into or reference in the seller’s sales agreement.

Details of the supplier of the safety data sheet

Company:
BASF Canada Inc.
5025 Creekbank Road
Building A, Floor 2
Mississauga, ON, L4W 0B6, CANADA

Telephone: +1 289 360-1300

Emergency telephone number

24 Hour Emergency Response Information
CHEMTREC: 1-800-424-9300
BASF HOTLINE: (800) 454-COPE (2673)

Other means of identification
Substance number: 409610
Synonyms: Pentaerythritol tetrakis(3-(3,5-di-tert-butyl-4-hydroxyphenyl)propionate)
2. Hazards Identification

According to Hazardous Products Regulations (HPR) (SOR/2015-17)

Classification of the product

Combustible Dust

Label elements

Signal Word: Warning

Hazard Statement: May form combustible dust concentration in air.

Hazards not otherwise classified

The product is under certain conditions capable of dust explosion.

3. Composition / Information on Ingredients

According to Hazardous Products Regulations (HPR) (SOR/2015-17)

Under the referenced regulation, this product does not contain any components classified for health hazards above the relevant cut off value.

4. First-Aid Measures

Description of first aid measures
General advice:
Remove contaminated clothing.

If inhaled:
Keep patient calm, remove to fresh air, seek medical attention.

If on skin:
Remove contaminated clothing. Rinse skin immediately with plenty of water for 15 - 20 minutes. If irritation develops, seek medical attention.

If in eyes:
Wash affected eyes for at least 15 minutes under running water with eyelids held open.

If irritation develops, seek medical attention.

If swallowed:
If swallowed, drink plenty of water. Do not induce vomiting. Seek medical attention.

Most important symptoms and effects, both acute and delayed
Symptoms: No applicable information available.

Indication of any immediate medical attention and special treatment needed
Note to physician
Treatment: Treat according to symptoms (decontamination, vital functions), no known specific antidote.

5. Fire-Fighting Measures

Extinguishing media

Suitable extinguishing media:
dry powder, carbon dioxide, alcohol-resistant foam
Unsuitable extinguishing media for safety reasons:
water jet

**Special hazards arising from the substance or mixture**
Hazard during fire-fighting:
harmful vapours
Evolution of fumes/fog. The substances/groups of substances mentioned can be released in case of fire.

**Advice for fire-fighters**
Protective equipment for fire-fighting:
Firefighters should be equipped with self-contained breathing apparatus and turn-out gear.

**Further information:**
Dusty conditions may ignite explosively in the presence of an ignition source causing flash fire.

**Impact Sensitivity:**
Number of positive reactions: 0
Assessment: not shock-sensitive

### 6. Accidental release measures

**Further accidental release measures:**
Avoid dispersal of dust in the air (i.e., clearing dust surfaces with compressed air). Avoid the formation and build-up of dust - danger of dust explosion. Dust in sufficient concentration can result in an explosive mixture in air. Handle to minimize dusting and eliminate open flame and other sources of ignition.

**Personal precautions, protective equipment and emergency procedures**
Avoid dust formation. Use personal protective clothing.

**Environmental precautions**
Contain contaminated water/firefighting water. Do not discharge into drains/surface waters/groundwater.

**Methods and material for containment and cleaning up**
Nonsparking tools should be used.

7. Handling and Storage

**Precautions for safe handling**
Breathing must be protected when large quantities are decanted without local exhaust ventilation.

Protection against fire and explosion:
Avoid dust formation. Dust in sufficient concentration can result in an explosive mixture in air. Handle to minimize dusting and eliminate open flame and other sources of ignition. Routine housekeeping should be instituted to ensure that dusts do not accumulate on surfaces. Dry powders can build static electricity charges when subjected to the friction of transfer and mixing operations. Provide adequate precautions, such as electrical grounding and bonding, or inert atmospheres. Refer to NFPA 654, Standard for the Prevention of Fire and Dust Explosions from the Manufacturing, Processing, and Handling of Combustible Particulate Solids (2013 Edition) for safe handling.

Dust explosion class: Dust explosion class 2 (Kst-value 200 up to 300 bar m s⁻¹).

**Conditions for safe storage, including any incompatibilities**
The product in undamaged packing need not be stored separately.

Further information on storage conditions: Keep container tightly closed and dry; store in a cool place.

Storage stability:
Storage temperature: < 40 °C
Protect from temperatures above: 40 °C

8. Exposure Controls/Personal Protection

**Components with occupational exposure limits**

No substance specific occupational exposure limits known.

The nuisance dust limit value is to be kept.
Particles, not otherwise specified, respirable
OSHA PEL: TWA value 5 mg/m³ Respirable fraction; TWA value 15 mg/m³ Total dust; TWA value 5 mg/m³ Respirable fraction; TWA value 15 mg/m³ Total dust; TWA value 50 millions of particles per cubic foot of air.
ACGIH TLV: TWA value 3 mg/m³ Respirable particles.

Particles, not otherwise specified, inhalable
OSHA PEL: TWA value 15 mg/m³ Total dust; TWA value 15 mg/m³ Total dust; TWA value 50 millions of particles per cubic foot of air.
ACGIH TLV: TWA value 10 mg/m³ Inhalable particles.

Advice on system design:
It is recommended that all dust control equipment such as local exhaust ventilation and material transport systems involved in handling of this product contain explosion relief vents or an explosion suppression system or an oxygen deficient environment. Ensure that dust-handling systems (such as exhaust ducts, dust collectors, vessels, and processing equipment) are designed in a manner to prevent the escape of dust into the work area (i.e., there is no leakage from the equipment). Use only appropriately classified electrical equipment and powered industrial trucks.

Personal protective equipment

Respiratory protection:
Respiratory protection may not be required under normal operating conditions if adequate ventilation is provided.

Hand protection:
Wear chemical resistant protective gloves.

Eye protection:
Safety glasses with side-shields.

Body protection:
Body protection must be chosen based on level of activity and exposure.
General safety and hygiene measures:
Wear protective clothing as necessary to minimize contact. Handle in accordance with good industrial hygiene and safety practice.

9. Physical and Chemical Properties

Form: powder
Odour: odourless
Odour threshold: No data available.
Colour: white
pH value: not soluble
melting range: 113 - 126 °C (measured)
Freezing point: No applicable information available.
boiling temperature: 281 °C (1,013 hPa) (OECD Guideline 103)
Sublimation point: No data available.
Flash point: not applicable
Flammability: not highly flammable
Lower explosion limit: For solids not relevant for classification and labelling.
Upper explosion limit: For solids not relevant for classification and labelling.
Autoignition: 400 °C
Vapour pressure: < 0.00001 Pa (measured) (20 °C)
Density: 1,116 g/cm3 (20 °C)
Bulk density: 300 - 600 kg/m3
Vapour density: No data available.
Partitioning coefficient n-octanol/water (log Pow): > 8 (Calculation Hansch/Leo) (25 °C)
Self-ignition temperature: not relevant
Thermal decomposition: > 350 °C
Viscosity, dynamic: not applicable, the product is a solid
Particle size: D50 141 µm (134001)
Solubility in water: < 0.1 mg/l (20 °C)
10. Stability and Reactivity

Reactivity
No hazardous reactions if stored and handled as prescribed/indicated.

Corrosion to metals:
Corrosive effects to metal are not anticipated.

Oxidizing properties:
Based on its structural properties the product is not classified as oxidizing.

Dust explosivity characteristics:
Kst: 210 m.bar/s
Revaluation 2015

Dust explosion class:
Dust explosion class 2 (Kst-value 200 up to 300 bar m s\(^{-1}\)) (St 2)

Chemical stability
The product is stable if stored and handled as prescribed/indicated.

Possibility of hazardous reactions
The product is chemically stable.
Dust explosion hazard.

Conditions to avoid
Avoid dust formation. Avoid deposition of dust. Avoid all sources of ignition: heat, sparks, open flame.
Avoid electro-static charge.

Incompatible materials
strong acids, strong bases, strong oxidizing agents
Hazardous decomposition products

Decomposition products:
Hazardous decomposition products: No hazardous decomposition products if stored and handled as prescribed/indicated.

Thermal decomposition:
> 350 °C

11. Toxicological information

Primary routes of exposure

Routes of entry for solids and liquids are ingestion and inhalation, but may include eye or skin contact. Routes of entry for gases include inhalation and eye contact. Skin contact may be a route of entry for liquefied gases.

Acute Toxicity/Effects

Acute toxicity
Assessment of acute toxicity: Virtually nontoxic after a single ingestion. Virtually nontoxic after a single skin contact. Virtually nontoxic by inhalation.

Oral
Type of value: LD50
Species: rat (male)
Value: > 5,000 mg/kg (OECD Guideline 423)

Inhalation
Type of value: LC50
Species: rat (male/female)
Value: > 1.95 mg/l (similar to OECD guideline 403)
Exposure time: 4 h
An aerosol was tested.
No mortality was observed.

Dermal
Type of value: LD50  
Species: rat  
Value: > 3,160 mg/kg (other)

Assessment other acute effects  
Assessment of STOT single:  
Based on the available information there is no specific target organ toxicity to be expected after a single exposure.

Irritation / corrosion  
Assessment of irritating effects: Not irritating to eyes and skin.

Skin  
Species: rabbit  
Result: non-irritant  
Method: OPP 81-5 (EPA-Guideline)

Eye  
Species: rabbit  
Result: non-irritant  
Method: similar to OECD guideline 405

Sensitization  
Assessment of sensitization: Skin sensitizing effects were not observed in animal studies.

Maurer optimisation test  
Species: guinea pig  
Result: Non-sensitizing.  
Method: similar to OECD guideline 406

Aspiration Hazard  
No aspiration hazard expected.

Chronic Toxicity/Effects  
Repeated dose toxicity  
Assessment of repeated dose toxicity: No substance-specific organtoxicity was observed after repeated administration to animals.
Repeated oral uptake of the substance did not cause substance-related effects.

**Genetic toxicity**
Assessment of mutagenicity: No mutagenic effect was found in various tests with bacteria and mammals. The substance was not genotoxic in a test with mammals.

**Carcinogenicity**
Assessment of carcinogenicity: In long-term studies in rats and mice in which the substance was given by feed, a carcinogenic effect was not observed.

**Reproductive toxicity**
Assessment of reproduction toxicity: The results of animal studies gave no indication of a fertility impairing effect.

**Teratogenicity**
Assessment of teratogenicity: No indications of a developmental toxic / teratogenic effect were seen in animal studies.

### 12. Ecological Information

**Toxicity**

**Aquatic toxicity**
Assessment of aquatic toxicity:
There is a high probability that the product is not acutely harmful to aquatic organisms. The inhibition of the degradation activity of activated sludge is not anticipated when introduced to biological treatment plants in appropriate low concentrations. No toxic effects occur within the range of solubility.

**Toxicity to fish**
LC50 (96 h) > 100 mg/l, Brachydanio rerio (OECD 203; ISO 7346; 92/69/EEC, C.1, static)
The product has low solubility in the test medium. An aqueous solution prepared with solubilizers has been tested. Limit concentration test only (LIMIT test). The details of the toxic effect relate to the nominal concentration. No toxic effects occur within the range of solubility.

**Aquatic invertebrates**
EC50 (24 h) > 86 mg/l, Daphnia magna (OECD Guideline 202, part 1, static)
The product has low solubility in the test medium. An aqueous solution prepared with solubilizers has been tested. The statement of the toxic effect relates to the analytically determined concentration. No toxic effects occur within the range of solubility.

Aquatic plants
EC50 (72 h) > 100 mg/l (growth rate), Scenedesmus subspicatus (Directive 88/302/EEC, part C, p. 89, static)
The product has low solubility in the test medium. An aqueous solution prepared with solubilizers has been tested. The details of the toxic effect relate to the nominal concentration. No toxic effects occur within the range of solubility.

No observed effect concentration (72 h) 100 mg/l (growth rate), Scenedesmus subspicatus (Directive 88/302/EEC, part C, p. 89, static)
The product has low solubility in the test medium. An aqueous solution prepared with solubilizers has been tested. The details of the toxic effect relate to the nominal concentration.

Chronic toxicity to fish
No data available regarding toxicity to fish.

Chronic toxicity to aquatic invertebrates
No observed effect concentration (21 d) >= 2 mg/l, Daphnia magna (OECD Guideline 211, semistatic)
The product has low solubility in the test medium. A saturated solution has been tested. Limit concentration test only (LIMIT test). The details of the toxic effect relate to the nominal concentration. No toxic effects occur within the range of solubility.

Assessment of terrestrial toxicity
No toxic effects have been observed in studies with soil living organisms.

Soil living organisms
Toxicity to soil dwelling organisms:
No observed effect concentration (56 d) >= 1,000 mg/kg, Eisenia foetida (OECD Guideline 222, artificial soil)

Toxicity to terrestrial plants
No data available.
Other terrestrial non-mammals
No data available.

**Microorganisms/Effect on activated sludge**

Toxicity to microorganisms
OECD Guideline 209 aerobic activated sludge, domestic/EC50 (3 h): > 100 mg/l
Limit concentration test only (LIMIT test). The details of the toxic effect relate to the nominal concentration.

**Persistence and degradability**

Assessment biodegradation and elimination (H2O)
Poorly biodegradable. Moderately/partially eliminated from water.
Not readily biodegradable (by OECD criteria).

Elimination information

4 % CO2 formation relative to the theoretical value (28 d) (OECD 301B; ISO 9439; 92/69/EEC, C.4-C) (aerobic, activated sludge, domestic, non-adapted) Poorly biodegradable.

45.2 % Specific analysis (35 d) (OECD 303A; ISO 11733; 92/69 EEC,V, C.10) (aerobic, aerobic microorganisms) Moderately/partially eliminated from water.

Assessment of stability in water
In contact with water the substance will hydrolyse slowly.
The product has not been tested. The statement has been derived from the structure of the product.

Information on Stability in Water (Hydrolysis)
approx. t1/2 2.06 a (25 °C), (calculated, pH 7)
In contact with water the substance will hydrolyse slowly. The product has not been tested. The statement has been derived from the structure of the product.

**Bioaccumulative potential**

Assessment bioaccumulation potential
May be accumulated in organisms.
**Bioaccumulation potential**
Bioconcentration factor: < 2.3 (OECD Guideline 305 C)

**Mobility in soil**

Assessment transport between environmental compartments
The substance will not evaporate into the atmosphere from the water surface.
Adsorption to solid soil phase is expected.

---

**13. Disposal considerations**

- **Waste disposal of substance:**
  Do not discharge into drains/surface waters/groundwater. Dispose of in accordance with national, state and local regulations.

- **Container disposal:**
  Dispose of in accordance with national, state and local regulations. Recommend crushing, puncturing or other means to prevent unauthorized use of used containers.

---

**14. Transport Information**

- **Land transport**
  TDG
  Not classified as a dangerous good under transport regulations

- **Sea transport**
  IMDG
  Not classified as a dangerous good under transport regulations

- **Air transport**
  IATA/ICAO
  Not classified as a dangerous good under transport regulations
15. Regulatory Information

**Federal Regulations**

**Registration status:**
- Cosmetic: DSL, CA released / listed
- Chemical: DSL, CA released / listed

**NFPA Hazard codes:**
- Health: 0
- Fire: 2
- Reactivity: 0
- Special:

16. Other Information

**SDS Prepared by:**
- BASF NA Product Regulations
- SDS Prepared on: 2020/09/11

We support worldwide Responsible Care® initiatives. We value the health and safety of our employees, customers, suppliers and neighbors, and the protection of the environment. Our commitment to Responsible Care is integral to conducting our business and operating our facilities in a safe and environmentally responsible fashion, supporting our customers and suppliers in ensuring the safe and environmentally sound handling of our products, and minimizing the impact of our operations on society and the environment during production, storage, transport, use and disposal of our products.

Irganox® 1010 is a registered trademark of BASF Canada or BASF SE
