

Tinuvin® 5071

Power Up your formulations with our latest sustainable light stabilizer for solvent-based coatings

Application:

- For all exterior solvent-based clear-coats (1K, 2K & UV)
- For substrates like metal, plastic and wood
- For automotive refinish, industrial, architectural and DIY coatings

Performance & Sustainability Highlights:

- VOC-free UV absorber / HALS blend for SB formulations
- No severe labelling, like CMR2, H361f, H317...
- Does not react w/ acidic components
- Does not soften dry films
- Superior photo-permanence than Tinuvin 5151
- Lower inherent color than Tinuvin 5151
- Shorter tack-free time in alkyd paints, therefore lower dirt pick-up

Characteristic Values:

Appearance:	Slightly yellowish liquid
Active content [%]:	100 %
Replacement (delivery form):	1.0 part Tinuvin 5151 with 1.0 part Tinuvin 5071
