

Efka® FL 3750

Product description

Flow and leveling agent

Key benefits

- Improves flow behavior and promotes leveling
- Reduces orange peeling and gives the coating a long wave effect
- Eliminates or reduces cratering
- Does not change surface tension and does not influence the recoatability and intercoat adhesion
- Highly compatible does not cause turbidity nor haze in clear coatings
- Thermally stable

Chemical nature

Polyacrylate

Properties

Physical form Clear, colourless liquid

Technical data

Solids content ~ 98 %

(no supply specification) Viscosity Brookfield at 20°C ~ 10,000 mPa·s

October 2019 page 1 of 2

Application

Efka® FL 3750 is a polyacrylate-based, solvent-free and silicone-free flow and leveling agent for all solvent-borne and solvent-free coatings. It also helps to reduce or eliminate craters. By using Efka® FL 3750, a smooth coating surface without orange peel and other defects can be obtained. The gloss, DOI and long-wave effects are also improved. Efka® FL 3750 does not change surface tension and therefore does not influence the recoatability and intercoat adhesion. Efka® FL 3750 does not cause turbidity nor haze, and thus is very well suitable for clear coatings and high gloss pigmented coatings.

Efka® FL 3750 is recommended for automotive coatings, refinishes, motorcycle coatings, bus & train and other transportation coatings, wood coatings, ACE and other general industrial coatings. Efka® FL 3750 is also suitable for UV curing formulations and powder coatings.

Efka® FL 3750 can be used in both ambient curing and baking curing systems.

Formulation guideline

0.05-0.5 % based on total formulation

The additive can be added into the formulation at any stage of the production process, including post addition.

Storage

Keep container tightly closed and dry; store in a cool place.
