

## FoamStar® SI 2240

### general

FoamStar® SI 2240 is a defoamer for pigment concentrates, pigmented aqueous coatings, printing inks and adhesives.

- spontaneous defoaming effect
- good compatibility and high efficiency
- broad food contact compliance
- excellent stability at high shear conditions e.g. grinding

### chemical nature

compound of modified polydimethylsiloxanes

---

## Properties

### physical form

colorless to slightly yellowish, clear to slightly hazy liquid

### storage

FoamStar® SI 2240 should always be stored in tightly closed containers.

### typical properties (no supply specification)

density at 20°C	~ 1.00 g/cm <sup>3</sup>
viscosity at 20°C	~ 600 mPa·s
refractive index at 20°C	~1.44

---

## Application

FoamStar® SI 2240 is a silicone based defoamer compound with a broad compatibility in various binder systems, spontaneous defoaming effect and excellent long term efficiency.

It is well suited for the production of pigment concentrates due to the fact that it shows excellent stability under high shear conditions. However, it also shows very good efficiency in the let-down stage.

FoamStar® SI 2240 has an extended food contact compliance and global country registrations.

### recommended concentrations

0.1 – 0.5% calculated on total formulation

## Contacts worldwide

## Asia
