Application

Joncryl HPD 196 MEA is a solution of a mid-range molecular weight acrylic resin in water and mono-ethanol amine. This solution is specifically designed to disperse organic pigments at high concentrations without compromising ink viscosity stability. In addition, it allows the manufacturing of color concentrates with 35% or higher pigment loading at very low viscosities.

Joncryl HPD 196 MEA is recommended for applications such as:

- Pigment dispersions
